

Research

- 1. Electrochemical immunosensor development with chitosan modified reduced graphene oxide-nanoceria nanocomposite for gentamicin detection.(Dec 2025).**
- 2. Studies on the Extraction of DNA from Human: Resourceful Material for the Identification.(Apr 2025)**
- 3. Insilico Analysis of Single Nucleotide Polymorphisms in Human NLRP2 Gene Associated with RHMs.(December 2022)**
- 4. Screening the genetic diversity of male and female breeds of Indian chickens using RAPD marker analysis.(Jun 2018)**
- 5. RFLP assessment for genetic diversity among Indian Poultry birds of Himalayan Region.(September 2016)**
- 6. IGF1 Gene As A Target For Genetic Diversity Among Indian Poultry Birds.(September 2016)**
- 7. estimation of molecular diversity between important native and pure female asiatic chickens using randomly amplified polymorphic dna (rapd).(aug 2014)**
- 8. SSR Molecular Marker and Analysis Report of Variety of Chicken for their Varying Weight.).(2014)**
- 9. Genetic Diversity of Himalayan Region Chicken through SSR Molecular Markers.(Sep 2013)**
- 10. DNA polymorphism among three native Indian chickens using RAPD markers.(Jun 2013)**

11. Screening for the Genetic Diversity among Local and Pure Breeds of Asiatic Chickens Using Blood Protein Polymorphisms by Sodium Dodecyl Sulphate Polyacrylamide Gel Electrophoresis (SDS-PAGE). (Jan 2013)
