# **Academic Program and Course Description Guide**

**2024**

## **Introduction:**

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

## **Concepts and terminology:**

**Academic Program Description:** The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

**Course Description:** Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

**Program Vision:** An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

**Program Mission:** Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

**Program Objectives:** They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

**Curriculum Structure:** All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

**Learning Outcomes:** A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

**Teaching and learning strategies:** They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

## **Academic Program Description Form**

**University Name:** University of Diyala

**Faculty/Institute:** College of Science

**Scientific Department:** Mathematics

**Academic or Professional Program Name:** BSC–Mathematics Sciences

**Final Certificate Name:** BSC–Mathematics Sciences

**Academic System:** Courses for 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup> stages, Bologna process for 1<sup>st</sup> stage.

**Description Preparation Date:** 6 May 2024

**File Completion Date:** 6 May 2024

**Signature:**

**Head of Department Name:**

**Assist. Prof. Dr. Fatima M ABOUD**

**Date:** 6 May 2024

**Signature:**

**Scientific Associate Name:**

**Prof. Dr. Munther Hamza Rathi**

**Date:** 6 May 2024

**The file is checked by:**

**Department of Quality Assurance and University Performance**

**Director of the Quality Assurance and University Performance Department:**

**Approval of the Dean**

### **1. Program Vision**

The Mathematics department keep pace with the scientific and technical development and access to the latest findings of modern mathematics in the world, and that the science of mathematics be an essential participant in the development of other sciences within the college.

Providing the student with the foundations of modern knowledge, advanced scientific research methods, high values, and developing the student's personality, making him a graduate capable of innovation, challenge, leadership, self-learning, teamwork, and competition locally, regionally, and globally.

Developing and updating school curricula in the light of contemporary global trends and subjecting them to a periodic calendar in accordance with international standards, taking into account local conditions.

### **2. Program Mission**

Introducing the community to the science of mathematics and trying to remove barriers that make it difficult to understand mathematics by linking this science to practical application.

Graduating active and distinguished scientific cadres scientifically and practically.

Advance the pace of scientific research and encourage research creativity.  
Access to academic accreditation nationally and globally.

### **3. Program Objectives**

- Preparing graduates who hold a bachelor's degree in mathematics and possess distinguished scientific and mathematical skills that enable them to

work in relevant governmental or private institutions and have the ability to continue their postgraduate studies.

- Exchanging experiences and strengthening links with Iraqi, regional and international universities and scientific institutions in the field of specialization.
- 3. Providing research and advisory services to various community institutions and contributing positively to solving community problems. undergraduate research, internships, and study–abroad

#### 4. Program Accreditation

Does the program have program accreditation? And from which agency?  
Not yet.

#### 5. Other external influences

Is there a sponsor for the program?  
No sponsor.

#### 6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements	5	10	%7	
College Requirements	6	18	%13	
Department Requirements	38	114	%86	
Summer Training	1	Without units		
Other				

\* This can include notes whether the course is basic or optional.

## 7. Program Description

Year/Level	Course Code	Course Name	Credit Hours	
	MathI101	Differential Calculus	7	-
	MathI102	Introduction to Foundation of Mathematics	7	-
	MathI103	Finite Mathematics	7	-
	MathI104	Introduction to computer science	5	-
	UODI101	Freedom and democracy and Human Rights	2	-
	UODI102	Arabic Language	2	-
	MathI211	Integral Calculus	7	-
	MathI212	Advanced Topics in Foundation of Mathematics	7	-
	MathI213	Introduction to Linear algebra	6	-
	MathI204	Computer\Office Applications	4	-
	COSI102	General Mechanics	4	-
	UODI103	English Language	2	-
		Linear Algebra 2	3	-
		Probability and statistic	3	-
		Electricity and Magnetics I	2	-
		Computer I	2	2
		Advanced Calculus I	3	-
		Differential equation I	3	-
		Freedom and Democracy	2	-
		Mathematical statistics	3	-
		Electricity and Magnetics 2	2	-
		Computer 2	2	2
		Advanced Calculus 2	3	-
		Differential equation 2	3	-
		Geometry	3	-

		Partial Differential Equations I	3	-
		Complex Analysis 2	3	-
		Functional Analysis 2	3	-
		Topology 2	3	-
		Operational Research 2	3	-
		Partial Differential Equations 2	3	-
		Project	2	-

## 8. Expected learning outcomes of the program

Knowledge	
Learning Outcomes 1: <i>Identification of Complex Relationships</i>	<p>A1: Graduates will be able to illustrate the structure and function of cellular components and explain how they interact in a living cell.</p> <p>A2::Good understanding of mathematics and statistics and their applications.</p> <p>A3::The ability to use the language of mathematics to explain and analyze mathematical ideas accurately.</p> <p>A4::The student is able to retrieve and remember information (facts, principles, rules, laws and theories as you know them).</p> <p>The ability to form mathematical proofs and conclusions.</p>
Skills	
Learning Outcomes 2: <i>Oral and Written Communication, Laboratory, Field Studies, Scientific Knowledge, Data Analyses and Critical Thinking</i>	<p>Learning Outcomes Statement 2: Graduates will be able to formally communicate the results of biological investigations using both oral and written communication skills.</p> <p>Learning Outcomes Statement 3: Graduates will be able to perform laboratory experiments and field studies, by using scientific equipment and computer technology while observing appropriate safety protocols.</p> <p>Graduates will be able to demonstrate a balanced concept of how scientific knowledge develops, including the historical development of foundational theories and laws and the nature of science.</p> <p>Graduates will be able to demonstrate scientific quantitative skills, such as the ability to conduct simple data analyses.</p> <p>Graduates will be able to use critical-thinking and problem-solving skills to develop a research project and/or paper.</p>
Ethics	
Learning Outcomes 4	<p>C1:: Creating a spirit of teamwork among students through laboratory groups, graduation projects, and reports. C2:: Boosting students' self-confidence through daily discussions via seminars. C3:: Enhancing students' confidence in facing challenges by completing their academic journey through</p>
Learning Outcomes 5	<p>C1:: Creating a spirit of teamwork among students through laboratory groups, graduation projects, and reports. C2:: Boosting students' self-confidence through daily discussions via seminars. C3:: Enhancing students' confidence in facing challenges by completing their academic journey through</p>

## 9. Teaching and Learning Strategies

Teaching and learning strategies and methods adopted in the implementation of the program in general.

## 10. Evaluation methods

Implemented at all stages of the program in general.

## 11. Faculty

### Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
Professor	Mathematics	Applied Algebra			1	
Professor	Mathematics	Algebraic Topology			1	
Assistant Professor	Mathematics	Applied Math			1	
Assistant Professor	Mathematics	Quantum Encryption			1	
Assistant Professor	Mathematics	Computational Mathematics			1	
Assistant Professor	Mathematics	Functional Analysis			1	
Assistant Professor	Mathematics	General Topology			2	
Assistant Professor	Mathematics	Optimization			1	

Assistant Professor	Mathematics	Number Theory			1	
Assistant Professor	Mathematics	Scheduling Machine			1	
Lecturer	Mathematics	Algebraic topology			1	
Lecturer	Mathematics	Fuzzy algebraic topology			1	
Lecturer	Mathematics	Dynamical system			1	
Lecturer	Mathematics	Fractional Differential Equations			1	
Lecturer	Mathematics	Mathematical Statistics			1	
Lecturer	Mathematics	Applied Mathematics			1	
Lecturer	Mathematics	Statistics			1	
Lecturer	Mathematics	Optimization			1	
Lecturer	Physics	Material and solid state			1	
Assistant Lecturer	Mathematics	Numerical Analysis			2	
Assistant Lecturer	Mathematics	Dynamical system			1	
Assistant Lecturer	Mathematics	Statistics			1	
Assistant Lecturer	Mathematics	Optimization control theory			1	

<b>Professional Development</b>
---------------------------------

<b>Mentoring new faculty members</b>
--------------------------------------

Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.
---

<b>Professional development of faculty members</b>
--

Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.
--

<b>12. Acceptance Criterion</b>
---------------------------------

(Setting regulations related to enrollment in the college or institute, whether central admission or others)
--

<b>13. The most important sources of information about the program</b>
--

State briefly the sources of information about the program.
---

<b>14. Program Development Plan</b>
-------------------------------------

The curricula are developed by adding modern topics that keep pace with the continuous development in mathematics and its applications. This is done through developing and training faculty members through their participation in seminars, courses, and attendance at scientific conferences for the purpose of being informed of the latest developments.
---

# First Stage

## Course Description Form of (Finite Mathematics)

1. Course Name:	
Finite Mathematics	
2. Course Code:	
3. Semester / Year:	
Semester/ First	
4. Description Preparation Date:	
2024	
5. Available Attendance Forms:	
Weekly- compulsory	
6. Number of Credit Hours (Total) / Number of Units (Total)	
90 hours	
7. Course administrator's name (mention all, if more than one name)	
Name: Amaal Mohi Nassief Email: amalmuhi@uodiyala.edu.iq	
8. Course Objectives	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>Students acquiring to knowledge of basic mathematics principles.</li> <li>Gaining computer skills and the ability to work on computer.</li> <li>Students acquiring to the skills that enable them to teach mathematics.</li> <li>Working on acquiring students the skills of conducting scientific research in the field of mathematics.</li> <li>Acquisition of mental and thinking skills in mathematics.</li> <li>Introduce students to the importance of mathematics.</li> </ul>
9. Teaching and Learning Strategies	

A. Cognitive goals

1. Students' ability to distinguish and cognitive awareness to diagnose general theories and principles in the study.
2. Future planning to link what the student has learned to daily life.
3. Practicing different types of mathematical proofs.  
Self-reliance in the achievement of mathematics

B. The skill goals of the program

1. Thinking skill.
2. Conclusion and evaluation skill.
3. Analysis skill.
4. Observation skill

Teaching and Learning Methods

1. Giving lectures and using textbooks.
2. Solving problems related to the scientific subject.
3. Writing scientific reports and analyzing data.
4. Using e-learning in teaching according to the available capabilities.  
Self-learning method.

Assessment methods

1. Conducting daily and monthly oral and written exams.
2. Writing scientific reports.

A. Affective and value goals

1. The student should make every effort to understand the principles of mathematics.
2. Support and express the views and discuss seriously.
3. The student should have self-confidence.  
The student should participate in the mathematics activities.

D. General and Transferable Skills (other skills relevant to employability and personal development).

1. Conducting laboratory experiments related to the lesson tool to develop students' skills.  
Conducting short tests to measure the level of understanding of the student.

## 10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Finite mathematics	An introduction to matrices	whiteboard	Quizzes, homework and final exams
2	=	=	Definitions of the matrix, square matrix, zero matrices and equality of matrices and providing examples	=	=
3	=	=	The addition of matrices, the properties of the addition of matrices and examples	=	=
4	=	=	The multiplications of matrices, the properties of multiplication of matrices and examples	=	=
5	=	=	Transposed matrix and its properties	=	=
6	=	=	The inverse of the matrix and theorems regarding that	=	=
7	=	=	Linear systems, geometric interpretation of them and elementary transformations of linear system	=	=
8	=	=	Gaussian elimination method	=	=
9	=	=	Gauss-Jordan elimination method	=	=

10	=	=	Determinant of the matrix	=	=
11	=	=	Minor determinate and the cofactor of an element	=	=
12	=	=	The properties of the determinate	=	=
13	=	=	The adjugate of the matrix	=	=
14	=	=	Solving the linear systems by using the inverse of the matrix	=	=
15	=	=	Cramer's Rule for solving the linear system	=	=

### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

### 12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	An Introduction in linear Algebra
Main references (sources)	An Introduction in linear Algebra
Recommended books and references (scientific journals, reports...)	An Finite Mathematics Books.
Electronic References, Websites	

## Course Description Form of (Differential Calculus)

13.	Course Name: Differential Calculus				
14.	Course Code: Math 1011

# Second Stage

## Course Description Form of 9 Ordinary differential equations)

1. Course Name: Ordinary differential equations	
2. Course Code:	
3.Semester / Year: First and second semester 2023-2024.	
4.Description Preparation Date:4-5-2024.	
5.Available Attendance Forms: Attend class	
6.Number of Credit Hours (Total): 120Hours / Number of Units (Total): 4 units	
7.Course administrator's name (mention all, if more than one name)	
Name: Dr.Ahmed murshed Kareem Email: a.murshed@yahoo.com	
8.Course Objectives	
<b>Course Objectives</b>	<b>1– Identify methods for solving first–order and first–order ordinary differential equations</b>  <b>2– Identify methods for solving ordinary differential equations with homogeneous higher orders.</b>  <b>3. Identify methods for solving non–homogeneous higher–order ordinary differential equations</b>
9.Teaching and Learning Strategies	
<b>Strategy</b>	1- Motivating students to participate in the lecture by giving Grades. 2- Daily surprise tests and monthly exams.  3- Encouraging students to review some modern sources related to ordinary differential equations
10.Course Structure	

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Separable equations	Ordinary differential equations of first order and first degree.	In class using the board	Participate in the lecture
2	4	Equations from Homogeneous type	Ordinary differential equations of first order and first degree.	In class using the board	Participate in the lecture
3	4	Equations are interpreted To homogeneous.	Ordinary differential equations of first order and first degree.	In class using the board	Participate in the lecture
4	4	Exact equations	Ordinary differential equations of first order and first degree.	In class using the board	Participate in the lecture
5	4	Integrating factors	Ordinary differential equations of first order and first degree.	In class using the board	Participate in the lecture
6	4	Linear equations	Ordinary differential equations of first order and first degree.	In class using the board	Participate in the lecture
7	4	Bernoulli equation	Ordinary differential equations of first order and first degree.	In class using the board	Participate in the lecture
8	4	Converting derivatives functions into a first derivative	Higher order differential equations and variable coefficients	In class using the board	Participate in the lecture
9	4	Equations in state of non-existence Dependent variable	Higher order differential equations and variable coefficients	In class using the board	Participate in the lecture
1	4	Equations in state of non-existence Independent variable	Higher order differential equations and variable coefficients	In class using the board	Participate in the lecture
1	4	Differential effect method	Higher order differential equations And fixed transactions	In class using the board	Participate in the lecture
1	4	wronskian	Higher order differential equations And fixed transactions	In class using	Participate in the lecture

				the board	
1	4	Differential effect method	Higher order differential equations And fixed transactions	In class using the board	Participate in the lecture
1	4	Differential effect method	Differential equations of order second has fixed coefficients	In class using the board	Participate in the lecture
1	4	The two roots are real and different	Differential equations of order second has fixed coefficients	In class using the board	Participate in the lecture
1	4	The two roots are fact and equal	Differential Equations of order second has fixed coefficients	In class using the board	
1	4	The two roots are Compound numbers	Differential equations of order second has fixed coefficients	In class using the board	Participate the lecture
1	4	Influencer Differential	Linear differential equations  Homogeneous of order n with  Fixed transactions	In class using the board	Daily exam
1	4	Transaction method Indefinite if the function is a polynomial	Non-homogeneous linear differential equations with constant coefficients	In class using the board	Daily exam
2	4	Transaction method Indefinite if the function is an exponential function	Non-homogeneous linear differential equations with constant coefficients	In class using the board	Daily exam
2	4	Transaction method	Non-homogeneous linear differential equations with constant coefficients	In class using the board	Daily exam

		Indefinite if the function is a trigonometric function			
2	4	Differential effect	Non-homogeneous differential equations with constant coefficients	linIn class using the board	
2	4	Change method Constants	Non-homogeneous differential equations with constant coefficients	linIn class using the board	Daily exam
2	4	Solve Euler equation	Euler equation	In class using the board	Daily exam
2	4	Laplace transform Functions	Laplace transforms	In class using the board	Daily exam
2	4	Inverse Laplace	Laplace transforms	In class using the board	Daily exam
2	4	Solve homogenous equations	Laplace transforms	In class using the board	Daily exam
2	4	Solve heterogeneity equations	Laplace transforms	In class using the board	Daily exam
2	4	Solve IVP	Laplace transforms	In class using the board	Daily exam
3	4	Comprehensive discussion	Methods for solving Ordinary differential equations	In class using the board	Daily exam
11. Course Evaluation					
The monthly exam is 40 marks, the daily exam and assignments are 10 marks, and the final exam is 50 marks					

12.Learning and Teaching Resources	
Required textbooks (curricular books, if any)	Ordinary Differential Equations with Applications
Main references (sources)	
Recommended books and references (scientific journals, reports...)	Braun, M., & Golubitsky, M. (1983). <i>Differential equations and their applications</i> (Vol. 2). New York: Springer-Verlag.

## Course Description Form of (Geometry)

25.	Course Name:					
	Geometry					
26.	Course Code:					
27.	Semester / Year:					
	2 <sup>nd</sup> Session/ Second					
28.	Description Preparation Date:					
	01/05/2024					
29.	Available Attendance Forms:					
	Weekly– compulsory					
30.	Number of Credit Hours (Total) / Number of Units (Total)					
	90 hours					
31.	Course administrator's name (mention all, if more than one name)					
	Name: Assist. Prof. Hamza B. Habib Email:					
32.	Course Objectives					
	Course Objectives	<ul style="list-style-type: none"> <li>Students get knowledge of basic mathematics principles</li> <li>Students get the skills that enable them to teach mathematics.</li> <li>Practice different types of mathematical proofs.</li> </ul>				
33.	Teaching and Learning Strategies					
	Strategy	Delivering and lecturing strategy with discussion and problem solving.				
34.	Course Structure					
	Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
	1	4	Geometry	Introduction to axiomatic systems and their properties	Whiteboard with the head projector	Quizzes and homework, addition to midsession and final exams
	2	=	=	Euclidean Geometry:	=	=

			Euclidean Postulates		
3	=	=	Some equivalent statements for Euclid's fifth axiom: the Playfair axiom	=	=
4	=	=	The Axiomatic System 1	=	=
5	=	=	Some theorems of the Axiomatic System 1	=	=
6	=	=	The Axiomatic System 2 with the theorems	=	=
7	=	=	The Axiomatic System 3: Fano's Geometry	=	=
8	=	=	Some Theorems of the Axiomatic System 3	=	=
9	=	=	The Axiomatic System 4: The Pappus Finite Geometry	=	=
10	=	=	Some Theorems of the Axiomatic System 4	=	=
11	=	=	The Axiomatic System 5	=	=
12	=	=	Some Theorems of the Axiomatic System 5	=	=
13	=	=	Hilbert's Incidence Axioms	=	=
14	=	=	Hilbert's Order Axioms	=	=
15	=	=	Hilbert's Congruence Axioms	=	=
<b>35. Course Evaluation</b>					
Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc					
<b>36. Learning and Teaching Resources</b>					
Required textbooks (curricular books, if any)			Introduction to Euclidean Geometry		
Main references (sources)			Books on plane geometry		
Recommended books and references (scientific journals, reports...)					
Electronic References, Websites					

# Third Stage

## Course Description Form of (Number Theory)

37. Course Name:					
Number Theory					
38. Course Code:					
39. Semester / Year:					
1 <sup>st</sup> Session/ Third					
40. Description Preparation Date:					
01/05/2024					
41. Available Attendance Forms:					
Weekly– compulsory					
42. Number of Credit Hours (Total) / Number of Units (Total)					
90 hours					
43. Course administrator's name (mention all, if more than one name)					
Name: Assist. Prof. Hamza B. Habib					
Email:					
44. Course Objectives					
Course Objectives		<ul style="list-style-type: none"> <li>Students get knowledge of basic mathematics principles</li> <li>Students get the skills that enable them to teach mathematics.</li> <li>Practice different types of mathematical proofs.</li> </ul>			
45. Teaching and Learning Strategies					
Strategy	Delivering and lecturing strategy with discussion and problem solving.				
46. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Number Theory	An introduction to Number Theory and its applications	Whiteboard with the head projector	Quizzes and homework, addition to midsession and final exams

2	=	=	Some Basic theorems and propositions	=	=
3	=	=	Prime numbers	=	=
4	=	=	The Greatest Common Divisor with basic theorems, gcd	=	=
5	=	=	The Fundamental Theorem of Arithmetic	=	=
6	=	=	The Division Algorithm Theorem with examples	=	=
7	=	=	The gcd theorem with examples	=	=
8	=	=	The Extension of Euclidian algorithm to find the gcd	=	=
9	=	=	The Congruence with some basic theorems	=	=
10	=	=	Linear congruences	=	=
11	=	=	Chinese Remainder Theorem	=	=
12	=	=	Euler's phi function	=	=
13	=	=	Euler's Theorem	=	=
14	=	=	Fermat's Little Theorem	=	=
15	=	=	Continued Fractions	=	=

#### 47. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

#### 48. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Elementary Number Theory and Applications
Main references (sources)	Elementary Number Theory and Applications
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	

## Course Description Form of (Real Analysis)

<b>1. Course Name:</b>					
Real Analysis/ First and Second courses					
<b>2. Course Code:</b>					
<b>3. Semester / Year:</b>					
course one and Two 2023–2024					
<b>4. Description Preparation Date:</b>					
5/5/2024					
<b>5. Available Attendance Forms:</b>					
Attendance					
<b>6. Number of Credit Hours (Total) / Number of Units (Total)</b>					
3					
<b>7. Course administrator's name (mention all, if more than one name)</b>					
Name: Dr. Lieth A Majed					
Email: liethen84@yahoo.com					
<b>8. Course Objectives</b>					
<b>Course Objectives</b>		Developing his analytical capabilities to reach logical solutions Identify the basic characteristics of mathematical analysis Develop logical thinking			
<b>9. Teaching and Learning Strategies</b>					
<b>Strategy</b>	Lectures Presentations Conducting oral and written examinations				
<b>10. Course Structure</b>					
<b>Week</b>	<b>Hours</b>	<b>Required Learning Outcomes</b>	<b>Unit or subject name</b>	<b>Learning method</b>	<b>Evaluation method</b>

1	6	Definitions	Real numbers	Board	Class exam, assignment
2	6	Bounded above	Bounded set	Board	Class exam, assignment
3	6	Proof	Density of rational number	Board	Class exam, assignment
4	6	properties	Density of irrational number	Board	Class exam, assignment
5	6	Examples	Cut set	Board	Class exam, assignment
6	6	Examples	Finite and infinite set	Board	Class exam, assignment
7	6	Theorems	Countable set	Board	Class exam, assignment
8	6	Definitions	Uncountable set	Board	Class exam, assignment
9	6	Examples	Metric space	Board	Class exam, assignment
10	6	Examples	Examples of metric space	Board	Class exam, assignment
11	6	Examples	Neighborhood	Board	Class exam, assignment
12	6	Examples	Interior set	Board	Class exam, assignment
13	6	Examples	Open set	Board	Class exam, assignment
14	6	Examples	Limit point	Board	Class exam, assignment
15	6	Examples	Closed set	Board	Class exam, assignment
16	6	Theorems	Properties of open and closed	Board	Class exam, assignment
17	6	Examples	Separated set in metric space	Board	Class exam, assignment
18	6	Properties	Connected set	Board	Class exam, assignment
19	6	Definition	Dense set	Board	Class exam, assignment
20	6	Definition	Cover set	Board	Class exam, assignment
21	6	Theorems	Compact set	Board	Class exam, assignment
22	6	Proof	Properties of compact set	Board	Class exam, assignment
23	6	Examples	Hein Borel Theorem	Board	Class exam, assignment
24	6	Theorems	Sequences	Board	Class exam, assignment
25	6	Examples	Convergence sequence	Board	Class exam, assignment
26	6	Examples	Divergence sequence	Board	Class exam, assignment
27	6	Examples	Cauchy sequence	Board	Class exam, assignment
28	6	Theorems	Properties of sequences	Board	Class exam, assignment
29	6	Definition	Series	Board	Class exam, assignment
30	6	Examples	Test of series	Board	Class exam, assignment
	6	Examples	Continuous	Board	Class exam, assignment
	6	Examples	Derivative	Board	Class exam, assignment
	6	Examples	Integral	Board	Class exam, assignment
	6	Examples	Riemann sum	Board	Class exam, assignment
	6	Properties	Riemann integral	Board	Class exam, assignment
	6	Examples	Measure set	Board	Class exam, assignment
	6	Definition	Lebesgue integral	Board	Class exam, assignment
	6	Theorems	Properties	Board	Class exam, assignment

## 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

## 12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	مقدمة في التحليل الرياضي تأليف: الاستاذ الدكتور عادل غسان نعوم
Main references (sources)	Real analysis, Royden ,new York ,2010. Principles of Mathematical analysis,Rudin, 2000. Introduction of Mathematical analysis, WilliamR. 20

Recommended books and references (scientific journals, reports...)	The most important books and special sources on mathematical analysis located in the central library, the science library, and the department.
Electronic References, Websites	Virtual library Websites

## Course Description Form of C++

3. Course Name:	
Computer science c++	
4. Course Code:	
5. Semester / Year:	
\ third	
6. Description Preparation Date:	
2024	
7. Available Attendance Forms:	
Weekly- compulsory	
8. Number of Credit Hours (Total) / Number of Units (Total)	
120 hours	
9. Course administrator's name (mention all, if more than one name)	
Name: Dr. Amaal Mohi Nassief Asst .lec.Israa Najam Email: amalmuhi@uodiyala.edu.iq	
10. Course Objectives	
Course Objectives	<ul style="list-style-type: none"> <li>Introducing the student to the basic principles of C++ programming, which are used in most applied mathematics topics, including engineering applications and all science departments.</li> <li>Acquire the skill of using a computer and the ability to program.</li> <li>Acquiring mental skills and thinking about mathematics solutions using computer programs.</li> <li>Building algorithms, flowcharts, and teaching programming.</li> </ul>
11. Strategies	
<ul style="list-style-type: none"> <li>Discussions that are presented during the lecture and an attempt to involve the largest number of students, address the details of the topics, and discuss them in an objective and directed discussion.</li> <li>Guiding students to use sources and training them on electronic research</li> </ul>	

## 12. Course Structure

Week	Hours		Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
	theoretical	practical				
1	2	2	Introducing the student to the principles of programming	Introduction to programming in C++ (Program interface, running and exiting the program, desktop, simple calculations and graphs)	Whiteboard+ computer	Quizzes, homework and final exams
2-3	4	4	Introducing the student to the principles of algorithms	study procedural programming principles	=	=
4-5	=	=	=	Algorithms and flowcharts, properties and design	=	=
6	2	2	The student defines the concept of variables in the programming language	C++ Language Basics (Character set, Identifiers, keywords Variables, Constants	=	=
7-8	4	4	Introducing the student to the concept of transactions in the language	C++ operators (Arithmetic Operators, Assignment operators, relational operator, comparison and logical operators, bitwise logical operators), type conversion	=	=
9-10	=	=	The student's definition of	Statements, getting started		

			programming sentences	with C++, order evaluation, The “math.h” Library, UnaryMinus, Increment and /decrement Operators.		
11-12	=		The student introduces the concept of choice sentences	Selection Statements (Selection Statements, The Single If Statement Structure, The Single If Statement Structure (Blocks), The If/else Statement Structure		
1316	=		=	Nested If and If/else Statements, else if statement		
14-19	2	2	The student's definition of conditional sentences	Switch statement, nested		
15	=	=	The student's definition of the repetition sentence	loop iteration Statements (while )Repetition Structure		
16	=	=	=	For Statement, More about		
17	=	=	The student's definition of repetitive phrases	Nested for Loops		
18	=	=	=	Break and Continue Contro		
19	=	=	=	Statements, goto		
20	=	=	=	Functions		
21	=	=		actual and formal arguments		

22-23	4	4	The student's definition of global and local variables	local and global variables,		
23-25	=	=	Student definition of Array	Arrays (Array of One)		
26-27			=	Two Dimension		
28-29	=	=	Student definition of series	string		

### 13. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

### 14. Learning and Teaching Resources

Required textbooks (curricular books, if any)	<b>C++ learning</b>
Main references (sources)	<b>step by step c++</b>
Recommended books and references (scientific journals, reports...)	<b>step by step c++</b>
Electronic References, Websites	

## Course Description Form of (Advanced statistics)

1. Course Name:					
Advanced statistics					
2. Course Code:					
MAAS 305					
3. Semester / Year:					
Semester					
4. Description Preparation Date:					
4/5/2024					
5. Available Attendance Forms:					
6. Number of Credit Hours (Total) / Number of Units (Total)					
45 hours (an average of 3 hours in week)					
7. Course administrator's name (mention all, if more than one name)					
Name: Huda Amer Abdule Ameer Email: hudaamer@uodiyala.edu.iq					
8. Course Objectives					
Course Objectives			<ul style="list-style-type: none"> <li>Introducing the student to the basic principles of advanced statistics, which are included in all fields of mathematics and its applications, which are included in engineering applications and all departments of science</li> <li>Students acquire the skills that enable them to teach mathematics</li> <li>Acquiring mental skills and thinking in mathematics</li> </ul>		
9. Teaching and Learning Strategies					
Strategy		Giving lectures and using methodological books Solving issues related to the scientific subject Writing scientific reports and analyzing data Using e-learning in teaching according to available capabilities			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	3	Definition of the concept of samples and sample statistics	Random sample, a sample census that follows a normal distribution and other distributions	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.

2	3	Define the concept of ordered statistics	The concept of ordered statistics, some of its applications	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
3	3	Define ordered statistics	Distribution of ranked statistics with their applications	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
4	3	Definition of sufficiency	The concept of sufficiency with examples	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
5	3	Family of exponential density functions, parameter space.	Definition of the family of exponential density functions, parameter space	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
6	3	Definition Efficiency function	The concept Efficiency function	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
7	3	Definition of the average square error of non-bias, consistency, modern probability density function	The concept of non-biased square error rate, consistency	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
8	3	Definition of Cramer-Rao efficiency, Fisher	The concept of Cramer-Rao efficiency, Fisher	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
9	3	Solve some different exercises on the topic of Estimation	Exercises and discussion	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
10	3	Definition of a concept that is estimated, unbiased, and has the least variance	What is the estimated, unbiased, and has the least variance	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
11	3	Definition of Rao-Blackwell and Ryman theorem	Rao-Blackwell and Ryman theorem with its application	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.

12	3	Defining the concept of estimation methods (likelihood).	Estimation methods (maximum odds and moments).	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
13	3	Definition of loss function, risk function	Definition of loss function, risk function	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
14	3	Methods of finding confidence limits, confidence limits for conditional non-parameters	Methods of finding confidence limits, confidence limits for conditional non-parameters	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
15	3	A week of preparation before the final exam		Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.

## 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

## 12. Learning and Teaching Resources

Required textbooks (curricular books, any)	1- Introduction to Mathematical Statistics Hogg and Cruisy Probability Theory , Mood'et-al.
Main references (sources)	
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	<a href="https://www.syriamath.net/library">https://www.syriamath.net/library</a>

## Course Description Form of (Test of Hypothesis)

13. Course Name:	
Test of Hypothesis	
14. Course Code:	
UoB12345	
15. Semester / Year:	
Semester	
16. Description Preparation Date:	
4/5/2024	
17. Available Attendance Forms:	
18. Number of Credit Hours (Total) / Number of Units (Total)	
45 hours (an average of 3 hours in week)	
19. Course administrator's name (mention all, if more than one name)	
Name: Huda Amer Abdula Ameer Email: hudaamer@uodiyala.edu.iq	
20. Course Objectives	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>Introducing the student to the basic principles of Test of Hypothesis statistics, which are included in all fields of mathematics and its applications, which are included in engineering applications and all departments of science</li> <li>Students acquire the skills that enable them to teach mathematics</li> <li>Acquiring mental skills and thinking in mathematics</li> </ul>
21. Teaching and Learning Strategies	
<b>Strategy</b>	<ul style="list-style-type: none"> <li>1- Giving lectures and using methodological books</li> <li>2- Solving issues related to the scientific subject</li> <li>3- Writing scientific reports and analyzing data</li> <li>4- Using e-learning in teaching according to available capabilities</li> </ul>
22. Course Structure	

<b>Week</b>	<b>Hours</b>	<b>Required Learning Outcomes</b>	<b>Unit or subject name</b>	<b>Learning method</b>	<b>Evaluation method</b>
1	3	Hypothesis tests	Determine Hypothesis tests	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
2	3	Definition of the concept of testing and critical area	The concept of the concept of testing and critical area	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
3	3	Definition of the concept of errors	Types of errors: Type-one error and Type-two error	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
4	3	Definition of the concept of test power	Test power function	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
5	3	Solve some different exercises on the test topic	Solve some different exercises on the test topic	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
6	3	Neyman-Pearson test	The concept Neyman-Pearson test	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
7	3	Determine the sample size, the best critical area, and the best test force	Determine, the best critical area	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
8	3	Sampling From The Normal Distribution	The concept of Sampling From The Normal Distribution	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
9	3	Some rules for testing hypotheses using a normal distribution	The concept of Some rules for testing hypotheses using a normal distribution	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
10	3	Solve questions dealing with hypothesis testing	Solve questions	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to

		using the normal distribution			monthly and final exams.
11	3	Definition of rank odds ratio	Definition of rank odds ratio	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
12	3	Introduction to the SPRT test	Definition to the SPRT test	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
13	3	Estimating the optimal sample size in the case of SPRT	Definition Estimating the optimal sample size in the case of SPRT	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
14	3	Analysis of Variance	Definition Analysis of Variance	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
15	3	A week of preparation before the final exam		Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.

### 23. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

### 24. Learning and Teaching Resources

Required textbooks (curricular books, any)	2- Introduction to Mathematical Statistics Hogg and Cruisay Probability Theory , Mood'et-al.
Main references (sources)

29. Semester / Year:					
2 <sup>nd</sup> Session/ Second					
30. Description Preparation Date:					
01/05/2024					
31. Available Attendance Forms:					
Weekly– compulsory					
32. Number of Credit Hours (Total) / Number of Units (Total)					
90 hours					
33. Course administrator's name (mention all, if more than one name)					
Name: Assist. Prof. Hamza B. Habib					
Email:					
34. Course Objectives					
Course Objectives		<ul style="list-style-type: none"> <li>Students get knowledge of basic mathematics principles</li> <li>Students get the skills that enable them to teach mathematics.</li> <li>Practice different types of mathematical proofs.</li> </ul>			
35. Teaching and Learning Strategies					
Strategy	Delivering and lecturing strategy with discussion and problem solving.				
36. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Geometry	Introduction to axiomatic systems and their properties	Whiteboard with the head projector	Quizzes and homework, addition to midsession and final exams
2	=	=	Euclidean Geometry: Euclidean Postulates	=	=
3	=	=	Some equivalent statements for Euclid's fifth axiom: the	=	=

			Playfair axiom		
4	=	=	The Axiomatic System 1	=	=
5	=	=	Some theorems of the Axiomatic System 1	=	=
6	=	=	The Axiomatic System 2 with the theorems	=	=
7	=	=	The Axiomatic System 3: Fano's Geometry	=	=
8	=	=	Some Theorems of the Axiomatic System 3	=	=
9	=	=	The Axiomatic System 4: The Pappus Finite Geometry	=	=
10	=	=	Some Theorems of the Axiomatic System 4	=	=
11	=	=	The Axiomatic System 5	=	=
12	=	=	Some Theorems of the Axiomatic System 5	=	=
13	=	=	Hilbert's Incidence Axioms	=	=
14	=	=	Hilbert's Order Axioms	=	=
15	=	=	Hilbert's Congruence Axioms	=	=

### 37. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

### 38. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Introduction to Euclidean Geometry
Main references (sources)	Books on plane geometry
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	

## Course Description Form of (Applied Mathematics)

25. Course Name:

Applied Mathematics					
26. Course Code:					
27. Semester / Year:					
2 <sup>st</sup> Session/ Third					
28. Description Preparation Date:					
01/05/2024					
29. Available Attendance Forms:					
Weekly– compulsory					
30. Number of Credit Hours (Total) / Number of Units (Total)					
90 hours					
31. Course administrator's name (mention all, if more than one name)					
Name: Assist. Prof. Rifaat Z. Khalaf Email:					
32. Course Objectives					
Course Objectives		<ul style="list-style-type: none"> <li>• Students get knowledge of basic mathematics principles</li> <li>• Students get the skills that enable them to teach mathematics</li> <li>• Practice different types of mathematical proofs.</li> </ul>			
33. Teaching and Learning Strategies					
Strategy	Delivering and lecturing strategy with discussion and problem solving.				
34. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Applied Mathematics	Elementary Differential Equations	Whiteboard with the head projector	Quizzes and homework, addition to midsession and final exams
2	=	=	Ceaser Cipher	=	=
3	=	=	Vigener Cipher	=	=
4	=	=	Multiplicative Cipher	=	=
5	=	=	Hill-Cipher	=	=

6	=	=	Linear Feedback Shift Regis	=	=
7	=	=	Randomness	=	=
8	=	=	Randomness Methods	=	=
9	=	=	Diffee-Hellman Protocol	=	=
10	=	=	Special Function	=	=
11	=	=	Gamma Function	=	=
12	=	=	Beta Function	=	=
13	=	=	Legendre and Beseel Functio	=	=
14	=	=	Perodic Function	=	=
15	=	=	Fourier Series	=	=

### 35. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

### 36. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Elementary Differenetal Equations
Main references (sources)	Elementary Differenetal Equations
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	

# Fourth Class

## Course Description Form of (Complex Analysis)

37. Course Name:					
Complex Analysis					
38. Course Code:					
<b>MAAS 305</b>					
39. Semester / Year:					
Semester					
40. Description Preparation Date:					
4/5/2024					
41. Available Attendance Forms:					
42. Number of Credit Hours (Total) / Number of Units (Total)					
<b>60 hours (an average of 4 hours in week)</b>					
43. Course administrator's name (mention all, if more than one name)					
Name: Asmaa Khawam AbdUL_rahman Email: asmaaalsaibi@uodiyala.edu.iq					
44. Course Objectives					
Course Objective	<ul style="list-style-type: none"> <li>Introducing the student to the basic principles of Complex Analysis, which are included in all fields of mathematics and its applications, which are included in engineering applications and all departments of science</li> <li>Students acquire the skills that enable them to teach mathematics</li> <li>Acquiring mental skills and thinking in mathematics</li> </ul>				
45. Teaching and Learning Strategies					
Strategy	Giving lectures and using methodological books Solving issues related to the scientific subject Writing scientific reports and analyzing data Using e-learning in teaching according to available capabilities				
46. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Definition of student With the principles of complex numbers, their algebraic	complex number definition, properties Geometric representation	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.

		<b>properties, and geometric representation</b>			
2	4	The student defines the field of complex numbers as a metric space	field of complex number as metric field .	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
3	4	Definition of student Some terminology about a group of complex numbers	Root of complex number	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
4	4	Defining the student what is the concept of regions in the complex plane and regions	Regions in The Complex Plane	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
5	4	Introducing the student to the concept of complex functions	Function of a complex Variable	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
6	4	Definition of student Continuous complex functions	Limits, Continuity	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
7	4	Definition of student Differentiable complex functions	Derivatives,	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
8	4	Introducing the student to the concept of analytical functions	Analytic Function	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
9	4	Introduce the student to some applications of the Cauchy-Riemann theorem	Cauchy- Riemann Equations	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
10	4	Introducing the student to the concept of harmonic	Harmonic Functions	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to

		<b>functions and their properties</b>			<b>monthly and final exams.</b>
11	4	Introducing the student to the concept of prime functions and their properties	Exponential Function	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
12	4	Introducing the student to the concept Trigonometric Function and their properties	Trigonometric Function	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
13	4	Introducing the student to the concept of Logarithmic Function and Hyperbolic Functions and their properties	Logarithmic Function, Hyperbolic Functions	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
14	4	Introducing the student to the concept of sequences and series	Convergence of Sequence, Convergence of Series, Pour Series, Convergence Pour Series, Taylor Series, Laure Series	Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.
15	4	A week of preparation before the final exam		Blackboard, data show, and introductory videos	Daily exams and homework, in addition to monthly and final exams.

#### **47. Course Evaluation**

**Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc**

#### **48. Learning and Teaching Resources**

<b>Required textbooks (curricular books, any)</b>	Complex Variable and Applications By : Churchill
<b>Main references (sources)</b>	Complex Analysis by : Ahlfors M.
<b>Recommended books and references (scientific journals, reports...)</b>	
<b>Electronic References, Websites</b>	<a href="https://www.syriamath.net/library">https://www.syriamath.net/library</a>

## Course Description Form of (Operations Research)

39.	Course Name: Operations Research				
40.	Course Code: 405MAOR				
41.	Semester / Year: Semester				
42.	Description Preparation Date: 2/5/2024				
43. Available Attendance Forms: Attendance - Online					
44. Number of Credit Hours (Total) / Number of Units (Total) 45hours/ 3units					
45.	Course administrator's name (mention all, if more than one name)				
Name: Assist. Prof. Dr. Adawiya Ali Mahmood					
Email: Dr.Adawiya@uodiyala.edu.iq					
46. Course Objectives					
<b>Course Objectives</b>	The students know principles of operations research. The students learn thinking in Mathematics. The students know the importance of Mathematics.				
47. Teaching and Learning Strategies					
<b>Strategy</b>	Giving lectures and using books. Solving problems. Using electronic learning in teaching.				
48. Course Structure					
<b>Week</b>	<b>Hours</b>	<b>Required Learning Outcomes</b>	<b>Unit or subject name</b>	<b>Learning method</b>	<b>Evaluation method</b>

1 2,3	3 6	The students know operation research The students learn mathematical model	Introduction in operations research  Building mathematical model	White board and data show  =    =	Oral and edited examinations  =    =
4,5	6				
6,7,8	9	The students learn linear programming methods The students learn	linear programming methods Simplex method, M	=    = =    =	=    = =    =
9,10,11	9	simplex method ,Big M method The students learn dual problem	Dual problem	=    =	=    =

#### 49. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

#### 50. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Operations Research Author Hamdy Taha Linear programming Author Hillier
Main references (sources)	Introduction of operations research Author Hamdy Taha Linear and non linear programming Author Hillier
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	1. <a href="https://notendur.hi.is">https://notendur.hi.is</a> 2. <a href="https://eco.nahrainuniv.edu.iq">https://eco.nahrainuniv.edu.iq</a>
