# Academic Program and Course Description Guide

#### **Introduction:**

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

#### **Concepts and terminology:**

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

**Program Vision:** An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

**Program Mission:** Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

<u>Learning Outcomes:</u> A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extracurricular activities to achieve the learning outcomes of the program.

# **Professional Development**

# Mentoring new faculty members

Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.

# Professional development of faculty members

Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

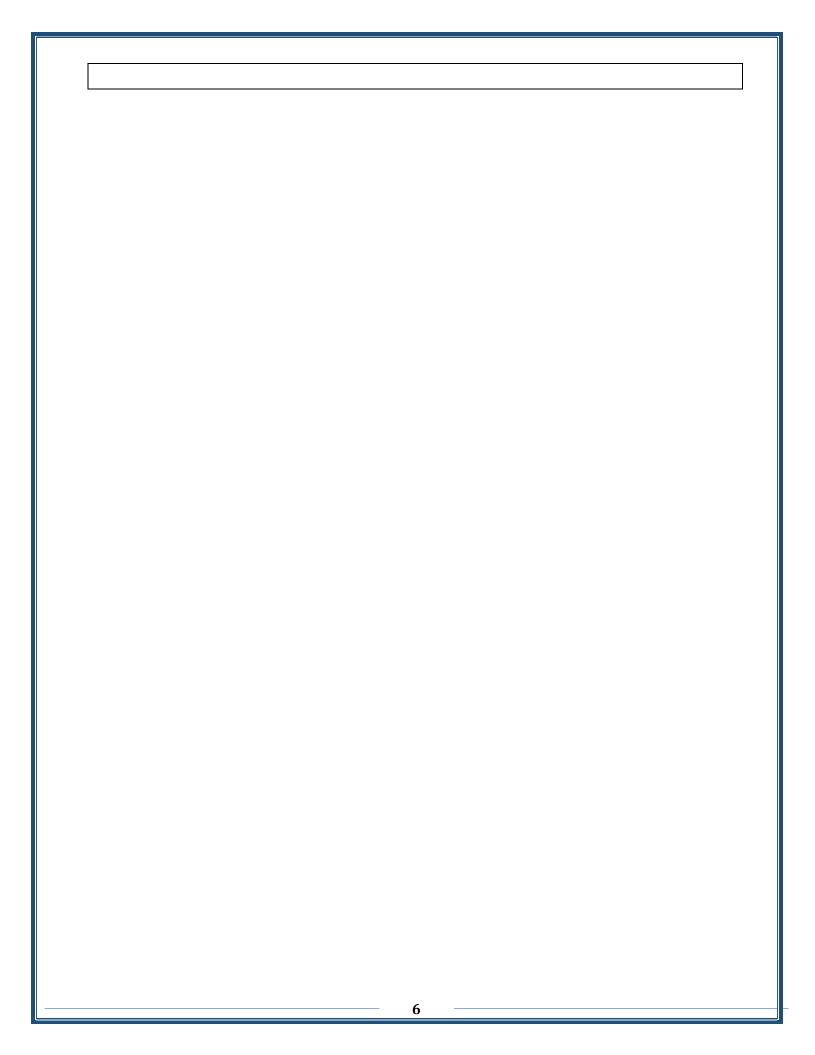

# 12. Acceptance Criterion

(Setting regulations related to enrollment in the college or institute, whether central admission or others)

# 13. The most important sources of information about the program

State briefly the sources of information about the program.

#### **Course Description Form**

1. Course Name:

Quantum Mechanics

- 2. Course Code:
- 3. Semester / Year:

First and second semester 2023-2024

4. Description Preparation Date:

1/10/2023

- 5. Available Attendance Forms:
- 6. Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 2 units

7. Course administrator's name (mention all, if more than one name)

Name: Faisal Ghazi Hammoodi

Email: faissal hammody@uodiyala.edu.iq

#### 8. Course Objectives

### **Course Objectives**

- 1. To develop skills in understanding Foundation of quantum mechanics.
- 2. To understand the principles of the Theories of black body radiation .
- 3. Develop an understanding of the Schrodinger time dependent equation..
- 4. Getting to know the photoelectric effect ,Requirement on wave function.
- 5. To understand the Requirement on wave function operators in quantum mechanics, Normalization function, Eigen function and Eigen value, Average or expectation value.
- 6.To understand the one-Dimensional simple harmonic oscillator classical mechanics, Generating function, the results of classical and quantum mechanics for simple harmonic oscillator.

# 9. Teaching and Learning Strategies

# **Strategy**

The main strategy that will be adopted is to present this unit in theoretical lecture from the professor of the scientific subject, while encouraging students to participal in clarifying the topics through discussion among students with the use of means clarification, including posters in addition to scientific films, with a description recent reports of scientists in this field.

Week	Hours	Required Learning	Unit or	Learning	Evaluation
		Outcomes	subject	method	method
			name		
1.	2	Inadequacy of classical theory to explain the spectrum of black body radiation, Theories of black body radiation.	Quantum Mechanics	The blackboard the data show	Monthly and daily exams homework
2.		photoelectric effect, The Compton Effect			
3.		Bohrs Theory of Hydrogen atom,The Somerfield Relativistic atom model.			
4.		Zeeman effect,Origin of normal Zeeman effect,origin of Anomalous			
5.		Zeeman effect. solved Examples			
6.		Schrodinger Equations, Introduction,Schrodinger time dependent equation and Schrodinger time independent equation			
7.		Requirement on wave function, Probability current density equation of continuity and its physical significances			
8.		operators in quantum mechanics,Normalization function, Eigen function			

	and Eigen value		
9.	Midterm exam		
10.	Average or expectation value, Variance, Exchanging of average value per unit time, Degeneracy		
11.	Parity, solved Examples		
11.	Introduction,one-		
12.	Dimensional simple harmonic oscillator classical mechanics		
13.	Normalization of wave function, Generating function		
14.	Comparison between the results of classical and quantum mechanics for simple harmonic oscillator		
	solved Examples		
15.			
Semester			
2			
16.	Free particles: Particles in one dimension box, Free particles in potential box in three dimensions The potential step,		
17.	Reflection and transmission in potentials barrier.		
18.	one – Dimensional Rectangular Potential Barrier (Quantum Mechanical Tunnelling Effect),One-Dimensional Square Well Potential (Free States).		
19.	One-Dimensional Square Well Potential of Finite Depth:Bound State,Density of states		

20.	solved Example		
21.	Particles in Spherically Symmetric Potentials(Spherical Harmonics), Schrodinger equation for a central potential, Solution of differential equation and The Hydrogen Atom.		
22.	The wave equation for the hydrogen atom, Reduction to Equivalent one-Body problem.		
23.	Separation of Variables Solution of the φ-equation		
24.	Midterm exam		
25.	Solution of the θ-equation, Solution of Radial equation		
26.	The Rigid Rotator, Solved Examples		
27.	Dirac Bra and Ket Notations, Properties of Bra and Ket Notations		
28.	Condition of Normalization, Orthogonality Condition, Eigenvalues and Eigenvector		
29.	Observable Operator, The Hermitian Adjoint		
30.	The Linear Harmonic Oscillator in Dirac Notation, Solved Examples Preparatory week before the final Exam  urse Evaluation		

# 11.Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such

as daily preparation, daily oral, monthly, or written exams, reports etc				
12.Learning and Teaching Resources				
Required textbooks (curricular books, any)	1.Perspective of Quantum Mechanics by S.P.Kuila ,first edition 2008			
	Quantum Mechanics Concept and Application.     Nouredine Zettili 2001.			
Main references (sources)				
Recommended books and references	1-1000 Solved problems in Modern physics			
(scientific journals, reports)	Ahmed A.Kamal ,2010			
Electronic References, Websites
